MONU KUMAVAT

Unity Game Developer (C#) | Mobile Casual & Hybrid-Casual Games | LiveOps

London, UK (Ready to relocate) | +44 7741 948421 | monukumavat37@gmail.com

kumavatmonu.github.io | linkedin.com/in/monu-kumavat | github.com/monu37 | Google Play: Game_Heart Studio

SUMMARY

Unity and C# developer who led development and LiveOps on Bingo Free World (10M+ downloads) and has shipped 30+ mobile titles on Android and iOS. 6 years in game development: 4 years at Codesoft Infotech and Zapplogics Solutions, then 2 years running my own studio, Game_Heart Studio. Most of my work is where gameplay meets the live game: features, events, ads and IAP, then fixing crashes and performance from the data.

SKILLS

Core: Unity (Unity 6, URP), C#, gameplay programming, mobile game development (Android, iOS), UI and animation (uGUI, TextMeshPro, Spine), Shader Graph and particle systems

Live game: LiveOps and Remote Config, Unity IAP, ad mediation (IronSource, AdMob, AppLovin MAX), Firebase (Analytics, Crashlytics), GameAnalytics and Singular

Engineering: Performance optimisation (Unity Profiler, Memory Profiler, object pooling), Photon multiplayer, REST APIs, Git and Jira (Agile)

EXPERIENCE

Founder & Unity Developer | Game_Heart Studio (Self-Employed), London *Sep 2024 - Present*

- Deliver Unity and C# work for 5-6 clients (incl. Fruit Fighter, Tengo Blitz): bug fixes, new features and updates to live projects. Half now hire me directly; others come through Upwork.
- Designed, built and published 5 games solo on Google Play (Word Sort ASMR, Arrow Crush 3D, Nut Flow, Perfect Slice 3D, Guess Me If You Can), each with its own core system, from knife-throw physics to conveyor sorting.
- Shipped a 500-level content update for Word Sort ASMR; ads, analytics and crash reporting in every title.

Game Developer | Zapplogics Solutions *May 2022 - May 2023*

- Built Unity editor tools and modular game templates the team reused across client projects, which made reskinning existing games into new titles much faster.
- Built a 2D space shooter with ads and IAP, and live sports apps (Tennis Live Score, Bet Calculator) running on real-time API data.
- Built 10+ slot games, Baccarat and an Aviator-style crash game: reel and spin logic, game maths, casino UI and animation.
- Profiled and fixed memory problems, shipped Android, iOS and WebGL builds, and worked in Agile sprints in Jira; reviewed code and onboarded an intern.

Game Developer | Codesoft Infotech *Jan 2021 - Apr 2022*

- Led Bingo Free World (10M+ downloads) with one other developer and one designer, running LiveOps: themed rooms (England, Japan, Spooky), limited-time event rooms, power-ups, an hourly bonus, and bonuses and events driven by Remote Config.
- Rebuilt the win logic, win animations and UI, simplified the IAP flow, added a forced-update prompt and worked with the REST API backend.
- Upgraded older company games to a newer Unity version and added IAP and Firebase (score tracking, Crashlytics), then fixed the crashes and ANRs it reported.
- Built gameplay, UI, Cinemachine cameras and NavMesh AI for hyper-casual and casual games, including Helix Ball Drop, from prototype to store; mentored an intern.

Part-Time Game Developer | Codesoft Infotech *Jun 2019 - Dec 2020*

- Built and shipped hyper-casual games in Unity and C# while finishing my BSc in Computer Science.
- Wrote gameplay, UI and level logic, and integrated ads before release.
- Tested builds on Android devices and used the Android Studio Profiler to catch bugs in running builds.

PROJECTS

Cosmic Racer | *Unity, C#, Photon* | Two-person real-time multiplayer racing game; I built the core gameplay and car mechanics. kumavatmonu.github.io/#projects

AI Quiz Game | *Unity, C#, OpenAI API* | Runtime questions and images via ChatGPT and DALL-E. github.com/monu37/AI_Quiz_Game

VR Space Shooter (MSc) | *Unity, XR Interaction Toolkit, Oculus* | VR shooter with controller aiming and hit detection. github.com/monu37/VR_Space_Shooter

EDUCATION

MSc Game Development Programming (Merit) | Kingston University, London *Sep 2023 - Sep 2024*

BSc Computer Science (CGPA 3.21/4) | KC College, India *2017 - 2020*
