MONU KUMAVAT

Unity Developer (C#) | Mobile Games, VR/XR & Real-Time 3D | 5+ Years

London, UK | Open to on-site, hybrid, remote and relocation | +44 7741 948421 | monukumavat37@gmail.com

Portfolio: kumavatmonu.github.io | linkedin.com/in/monu-kumavat | github.com/monu37 | Google Play: Game_Heart Studio

SUMMARY

Unity developer with **5+ years of C# and Unity** across casual, hybrid-casual, casino, multiplayer, VR and AI-driven games and apps. I've shipped **25+ games on Android and iOS**, run LiveOps on a **10M+ download** title, built a VR shooter with the XR Interaction Toolkit, and created tools and templates used across 22+ projects. MSc in Game Development Programming. Ready for any Unity team: games, LiveOps, XR, simulation or tools.

HIGHLIGHTS

- Lifted retention by **~20%** on **Bingo Free World (10M+ downloads)** with LiveOps features and events.
- Cut client-server sync delays by **~40%** and gained **25-30%** performance on mobile through profiling and memory work.
- Built **Unity editor tools and reusable templates** used across 22+ projects; designed and published **5 games of my own**.

SKILLS

Unity & C#: Unity (Unity 6, URP), C#, C++, Python, OOP, SOLID, design patterns, gameplay programming, UI (uGUI, TextMeshPro), physics, animation, Cinemachine, NavMesh AI

XR & 3D: XR Interaction Toolkit, Oculus Integration (Meta), VR interaction, Shader Graph, custom URP Renderer Features, particle systems, draw-call reduction, texture compression

Optimisation & Debugging: Performance optimisation, Unity Profiler, Memory Profiler, object pooling, Addressables, multi-threading, ECS/DOTS, crashes & ANRs (Firebase Crashlytics), native Android/iOS debugging

Platforms & Integration: Android, iOS, WebGL, PC; Photon multiplayer, REST APIs, Firebase, Remote Config, Unity IAP, IronSource, AdMob, AppLovin MAX, Singular, GameAnalytics, OpenAI API

Ways of Working: Agile (Jira), Git, Plastic SCM, CI/CD, unit testing, TDD, code reviews, editor tools, mentoring, AI-assisted development (ChatGPT, Claude, Copilot)

EXPERIENCE

Indie Game Developer & Freelance Unity Developer | **Game_Heart Studio (Self-Employed)** | *Sep 2024 - Present*

- Designed, built and published **5 mobile games** on Google Play (Word Sort ASMR, Arrow Crush 3D, Nut Flow, Perfect Slice 3D, Guess Me If You Can), owning code, design, release and updates.
- Built a different core system for each: knife-throw physics with boss boards and unlockables, 3D arrow-block clearing, conveyor sorting, timed word levels with ASMR audio.
- Integrated ads, analytics and crash reporting, tracked revenue in dashboards, and shipped regular updates, including a 500-level content drop.
- Deliver freelance Unity and C# work for clients through Upwork (since Jan 2026), using AI tools daily to prototype and debug faster.

Game Developer | **Zapplogics Solutions** | *May 2022 - May 2023*

- Built **10+ slot games, Baccarat and an Aviator-style crash game**, plus live sports apps (Tennis Live Score, Bet Calculator) running on real-time API data.
- Created **Unity editor tools and modular templates** that sped up delivery across 22+ client projects.
- Traced a client-server sync bottleneck to its root cause and reworked data handling, cutting delays by **~40%**.
- Profiled builds and fixed memory bottlenecks for a **~25%** performance gain; shipped Android, iOS, WebGL and WebView builds through CI/CD.
- Worked with designers, artists and clients in Agile sprints with Jira; reviewed code and mentored an intern.

Game Developer | **Codesoft Infotech** | *Jan 2021 - Apr 2022*

- Ran LiveOps on **Bingo Free World (10M+ downloads)**: themed rooms, limited-time events, power-ups, hourly bonuses and Remote Config; retention up **~20%**.
- Rebuilt the win logic and UI, simplified IAP, added a forced-update flow and worked on the REST API backend.
- Built gameplay, UI, Cinemachine cameras and NavMesh AI for **20+ hyper-casual and casual games** (incl. Helix Ball Drop), prototype to store.
- Cut load times and stutter by **~30%** through profiling, object pooling and memory work; mentored junior developers.

Part-Time Game Developer | **Codesoft Infotech** | *Jun 2019 - Dec 2020*

- Shipped hyper-casual games in Unity and C# during my final-year BSc: gameplay, UI and release testing.

PROJECTS

VR Space Shooter / *Unity, XR Interaction Toolkit, Oculus* | VR shooter with tracked-controller aiming and hit detection. github.com/monu37/VR_Space_Shooter

Cosmic Racer / *Unity, C#, Photon* | Real-time multiplayer 3D racing game. kumavatmonu.github.io/

Blockchain RPG Odyssey (MSc) / *Unity, C#, NEAR* | 2D RPG with NFT item trading via a NEAR wallet. github.com/monu37/Ethereal_Realms_The_Blockchain_RPG_Odyssey

AI Quiz Game / *Unity, C#, OpenAI API* | Runtime questions and images via ChatGPT and DALL-E APIs. github.com/monu37/AI_Quiz_Game

EDUCATION

MSc Game Development Programming | Kingston University, London, UK / *Sep 2023 - Sep 2024*

BSc Computer Science | KC College, India / *2017 - 2020*
